# 1974 INDEX OF ARTICLES PUBLISHED IN MATERIALS ENGINEERING

## INDEX OF FEATURE ARTICLES

ALUMINUM AND ITS ALLOYS

Fourteen new aluminum alloys offer strength, ductility and conductivity--Feb, p 20
High performance cars demand high performance materials--May, p 22
Light aircraft: 'composites' of new and traditional materials--Aug, p 12
Most nonferrous metals and alloys weather well--Apr, p 64
Nonferrous metals and alloys for automobiles--a look at today and tomorrow--May, p 67
What's ahead in aircraft and aerospace materials--Nov, p 45

CARBON AND GRAPHITE

Carbon and graphite: tough to beat for hot, corrosive environments--Dec, p 56

CERAMICS

Ceramic and refractory coatings (Manual 251)--Nov, p 101
Coal gasification poses demanding material requirements--July, p 16
If heat is the problem, silicon carbide may be the answer--Aug, p 44
Specialty glasses spark new electronic and appliance designs--Sept, p 28
Thermal and electrical properties: key reasons for considering beryllia--Mar, p 22
Zirconia and yttria-thoria ceramics find new uses as solid electrolytes--Jan, p 48

COATINGS

Conversion coatings (Manual 246)--Mar, p 57
Ceramic and refractory coatings (Manual 251)--Nov, p 101
Electrodeposited organic paints are nonpolluting, uniform--July, p 36
Epoxy paints stick to materials, cure without heat, resist chemicals--Jan, p 36
Finishes solve some tough corrosion and wear problems in cars--May, p 80
How ten generic coatings perform outdoors for periods up to 15 years--Apr, p 51
Porcelain enamel is alive and well and living everywhere--June, p 70
Silicone coatings and lubricants tackle heat, weather and water--Sept, p 54
Stabilizers and coatings protect plastics against weathering--Apr, p 54
What's new in finishes for steel--Feb, p 36

COBALT

Most nonferrous metals and alloys weather well--Apr, p 64

COMPOSITES

Bimetal bearings offer improved performance at lower cost--July, p 44
Cast bonding produces quality metallic composites--Oct, p 60
High performance cars demand high performance materials--May, p 22
Improved manufacturing methods key to lower cost boron-aluminum composites--Apr, p 46
Nonferrous metals and alloys for automobiles--a look at today and tomorrow--May, p 67
What's ahead in aircraft and aerospace materials--Nov, p 45

COPPER

Copper-nickel cuts corrosion, enhances electrical efficiency--Dec, p 40
Most nonferrous metals and alloys weather well--Apr, p 64
Nickel-silvers combine high strength, good fabricability and are attractive--Jan, p 42
Nonferrous metals and alloys for automobiles--a look at today and tomorrow--May, p 67
Wrought brass (Manual 250)--Oct, p 65

ELECTRICAL AND ELECTRONIC PROPERTIES AND MATERIALS

Guide to the selection of electrical steels--Aug, p 20
Heat resistant mica is a natural for electrical insulation--Oct, p 44
Specialty glasses spark new electronic and appliance designs--Sept, p 28
Thermal and electrical properties: key reasons for considering beryllia--Feb, p 22
Zirconia and yttria-thoria ceramics find new uses as solid electrolytes--Jan, p 48

FIBERS

Primer on organic man-made fibers--Aug, p 34

FORMING

Cold extrusion cuts cost, speeds production of steel parts--June, p 50
Guide to plastics stock shapes--June, p 36
Wire skeletons cut costs to the bone--Nov, p 10

GLASS

See the light safely with safety glass--June, p 38
Specialty glasses spark new electronic and appliance designs--Sept, p 28

HIGH TEMPERATURE PROPERTIES AND MATERIALS

Carbon and graphite: tough to beat for hot, corrosive environments--Dec, p 56
Coal gasification poses demanding material requirements--July, p 16
Heat resistant mica is a natural for electrical insulation--Oct, p 44
If heat is the problem, silicon carbide may be the answer--Aug, p 44
New stainless steels for corrosion and heat resistance--Feb, p 31
Perfluoroelastomer takes on high heat, strong chemicals--Dec, p 54
Silicone coatings and lubricants tackle heat, weather and water--Sept, p 54
Thermal and electrical properties: key reasons for considering beryllia--Mar, p 22
Zirconia and yttria-thoria ceramics find new uses as solid electrolytes--Jan, p 48

JOINING, FASTENING, SEALING

15 ideas for choosing and using adhesives to cut costs, problems--Oct, p 28
Modified epoxy adhesives speed honeycomb bonding--May, p 92
Sealants seal out dust, moisture, hold back liquids and gases--June, p 28
Selecting solders for specific substrates--Sept, p 76
Seven mechanical fasteners speed assembly of thermoplastics--Dec, p 24

MAGNESIUM AND ITS ALLOYS

High performance cars demand high performance materials--May, p 22
Most nonferrous metals and alloys weather well--Apr, p 64
Nonferrous metals and alloys for automobiles--a look at today and tomorrow--May, p 67

MATERIALS APPLICATIONS

Auto safety and emission control create new uses for many rubbers--May, p 48
Bimetal bearings offer improved performance at lower cost--July, p 44
Coal gasification poses demanding material requirements--July, p 16
Heat resistant mica is a natural for electrical insulation--Oct, p 44
High performance cars demand high performance materials--May, p 22
Irons and steels endure off-highway extremes--Nov, p 74
Low cost decorative parts with urethane structural foams--July, p 24
Light aircraft: 'composites' of new and traditional materials--Sept, p 12
New weight and cost saving steels for automotive applications--May, p 62
Specialty glasses spark new electronic and appliance designs--Sept, p 28
Stronger, tougher steels to move oil and gas--Feb, p 44
Thermal and electrical properties: key reasons for considering beryllia--Mar, p 22
Wrought steels strive for new uses, fight back to retain others--Feb, p 60
Zirconia and yttria-thoria ceramics find new uses as solid electrolytes--Jan, p 48

MISCELLANEOUS

Materials supplies: but first the bad news--Apr, p 29
The dollar squeeze on materials--Jan, p 24
Warm wire sandwich soothes aching muscles--Oct, p 22

NICKEL AND ITS ALLOYS

Most nonferrous metals and alloys weather well--Apr, p 64
Nickel-copper alloys fight corrosion; useful over wide temperature range--Sept, p 42
What's ahead in aircraft and aerospace materials--Nov, p 45

NOISE CONTROL

Four ways materials combat noise pollution--June, p 20

PLASTICS

Environmentally degradable plastics--Apr, p 20
Ethylene copolymers: tough, flexible thermoplastics--Aug, p 40
Get the most out of FRP, use special thermoset polyesters--Nov, p 30
Guide to plastics stock shapes--June, p 36
High performance fibers stabilize thermoplastics--Jan, p 54
Light aircraft: 'composites' of new and traditional materials--Sept, p 12
Low cost decorative parts with urethane structural foams--July, p 24
Phenolic plastics (Manual 249)--Sept, p 89
(continued)

Plastics (continued)

Plastic windows don't break--Mar, p 26
Plastics are key to compacts' weight savings--May, p 44
Polyimide plastics (Manual 245)--Feb, p 69
Special grades extend ABS properties to new highs--Jan, p 50
Stabilizers and coatings protect plastics against weathering--Apr, p 54
Thermoplastic polyesters: versatile engineering materials--Oct, p 48
What's ahead in aircraft and aerospace materials--Nov, p 45

RUBBER AND ELASTOMERS

How rubbers compare in weathering resistance--Apr, p 58
Perfluoroelastomer takes on high heat, strong chemicals--Dec, p 54
Relative performance of rubbers and elastomers--July, p 26

STEELS AND IRON

Cast irons (Manual 247)--June, p 52
Coal gasification poses demanding material requirements--July, p 16
Cold extrusion cuts cost, speeds production of steel parts--June, p 50
Cyclic testing of stainless steels gives new high temperature data--Mar, p 40
Electroslag remelting improves carbon, alloy and stainless steels--Feb, p 52
Guide to the selection of electrical steels--Aug, p 20
High performance cars demand high performance materials--May, p 22
Irons and steels endure off-highway extremes--Nov, p 74
Light aircraft: 'composites' of new and traditional materials--Sept, p 12
More cost-effective steels cover a broad front--Jan, p 40
New generation HSLA steels are stronger and more formable--Feb, p 24
New stainless steels for corrosion and heat resistance--Feb, p 31
New weight and cost saving steels for automotive applications--May, p 62
Standard wrought austenitic steels--Dec, p 63
Stronger, tougher steels to move oil and gas--Feb, p 44
Weathering resistance of iron and steels--Apr, p 60
What's ahead in aircraft and aerospace materials--Nov, p 45
What's new in finishes for steel--Feb, p 36
Wire skeletons cut costs to the bone--Nov, p 10
Wrought steels strive for new uses, fight back to retain others--Feb, p 60

TESTING

Cyclic testing of stainless steels gives new high temperature data--Feb, p 40
How fatigue crack growth is checked in a simulated reactor environment--Aug, p 52

TITANIUM AND ITS ALLOYS

High performance cars demand high performance materials--May, p 22
Titanium and its alloys (Manual 248)--July, p 59
What's ahead in aircraft and aerospace materials--Nov, p 45

WOOD

Engineering properties of ten particleboards--Oct, p 42

## INDEX OF AUTHORS

Chatfield, V.M. — If heat is the problem, silicon carbide may be the answer--Aug, p 44

Cooley, C.J. — More cost-effective steels cover a broad front--Jan, p 40

Dittmer, W.D. — Improved manufacturing methods key to lower cost boron-aluminum composites--Apr, p 46

Edwards, C. and Smith, E. — Seven mechanical fasteners speed assembly of thermoplastics--Dec, p 24

Hall, A.M. — Coal gasification poses demanding material requirements--July, p 16
Stronger, tougher steels to move oil and gas--Feb, p 44

Houston, A.M. — Perfluoroelastomer takes on high heat, strong chemicals--Dec, p 54

Jasper, J.C. — Cyclic testing of stainless steels gives new high temperature data--Mar, p 40

Kura, J.G. — Cast bonding produces quality metallic composites--Oct, p 60

McNatt, J.D. — Engineering properties of ten particleboards--Oct, p 42

Miska, K.H. — Copper-nickel cuts corrosion, enhances electrical efficiency--Dec, p 40
Four ways materials combat noise pollution--June, p 20
Fourteen new aluminum alloys offer strength, ductility and conductivity--Feb, p 20
High performance cars demand high performance materials--May, p 22
Irons and steels endure off-highway extremes--Nov, p 74
Most nonferrous metals and alloys weather well--Apr, p 64
Nickel silvers combine high strength, good fabricability and are attractive--Jan, p 42
Nonferrous metals and alloys for automobiles--a look at today and tomorrow--May, p 67
See the light safely with safety glass--June, p 38
Titanium and its alloys (Manual 248)--July, p 59
Wrought brass (Manual 250)--Oct, p 65

Mock, J.A. — Carbon and graphite: tough to beat for hot, corrosive environments--Dec, p 56
Ceramic and refractory coatings (Manual 251)--Nov, p 101
Conversion coatings (Manual 246)--Mar, p 57
Electrodeposited organic paints are nonpolluting, uniform--July, p 36
Heat resistant mica is a natural for electrical insulation--Oct, p 44
How ten generic coatings perform outdoors for periods up to 15 years--Apr, p 51
Porcelain enamel is alive and well and living everywhere--June, p 70
What's new in finishes for steel--Feb, p 36
